Postdoctoral Fellowships: Preliminary Applications due
December 1, 2017

SESYNC-Georgetown Postdoctoral Fellowships

SESYNC and Georgetown University invite applications for two postdoctoral fellowship opportunities beginning August 2018.

Coping with Disaster in a Warming World

The fellow will work with a Dr. Raphael Calel of Georgetown University to address critical gaps in our understanding of how societies cope with the sorts of natural disasters that are expected to become more frequent and more devastating in coming decades.

Ecological Connections: Climate and Health

The fellow will work with a Dr. Laura Anderko of Georgetown University to address critical research gaps on the relationship between the changing environment and children's respiratory health by building a model based on the synthesis of multiple data sets and a wide range of variables.

SESYNC-RTI Postdoctoral Fellowship: Modeling the Impacts of Food Waste on the Environment

SESYNC and the Research Triangle Institute (RTI) invite applications for a two-year postdoctoral fellowship opportunity, focused on Coping with Modeling the Impacts of Food Waste on the Environment that begins August 2018. The fellow will work with a Dr. Mary Muth of RTI on a project that contributes to our understanding of the environmental, ecological, and economic impacts of food

loss and waste across the U.S. food system, taking into consideration all sources of impacts from input sourcing in agricultural production through landfill disposal of waste.

Job Opportunities

Science Communications Coordinator

Application Deadline: December 1, 2017

The National Socio-Environmental Synthesis Center (SESYNC) seeks a full-time, experienced science communications professional to lead communications activities. The primary focus of the Science Communications Coordinator is to enhance awareness and understanding of SESYNC research

and opportunities within the community of socio-environmental scientists, scientific knowledge users, and policy makers. We are looking for a creative self-starter with three years of experience in science communications, including science writing for the educated public, strategic use of social media, and content management or web publishing. Desired qualifications include excellent written, oral, and interpersonal communication skills; the ability to manage multiple projects; the ability to interact effectively with researchers, administrators, and the press. Interest in environmental or social sciences would be a plus.

To learn more and apply, please [visit our website](#).

Research Accounts Coordinator

Application Deadline: November 27, 2017

Reporting to the Associate Director of Finance and Administration, the Research Accounts Coordinator will be responsible for managing the financial aspects of multiple research accounts. The Accounts Coordinator will assist with new grant proposal routing and budget preparation, sub-award monitoring, accurate reporting, and compliance with federal and state regulations as well as ensuring adherence to University of Maryland policies and procedures. The incumbent will share management responsibility for SESYNC's financial operations.

Upcoming Workshops

Graduate Student Workshop on Socio-Environmental Synthesis: Interdisciplinary Skill Building, Proposal Writing, & Collaborating

Application Deadline: November 20, 2018

SESYNC invites applications for the 5th annual Graduate Student Workshop on Socio-Environmental (S-E) Synthesis, to be held January 23-26, 2018, in Annapolis, Maryland. Workshop goals are to:

- Energize and engage students in innovative, team-based, user-inspired S-E synthesis research
- Increase student capacities through S-E synthesis training, skill-building, and networking
- Prepare students for upcoming S-E synthesis research and leadership opportunities at SESYNC

Attendees of this workshop will join 30 of their peers from around the world and across scholarly disciplines. Attendees will participate in highly interactive activities and facilitated discussions as individuals, but will also be given the

opportunity while in Annapolis to form the beginnings of diverse, interdisciplinary research teams.

Geospatial Data Analysis Short Course

Application Deadline: January 5, 2018

SESYNC invites applications to a Geospatial Data Analysis Short Course to be held April 2-4 at SESYNC in Annapolis, Maryland. The course aims to accelerate the adoption of open source computing resources for geospatial and temporal analyses of socio-environmental issues. The event will combine lectures with hands-on computer labs that teach new analytical methods and workflow skills through several example applications: land cover change following wildfire, environmental vulnerability to lead exposure, suitability analysis for conservation easements, and flood mapping in urban environments.

Through this short course, participants should expect to:

- use open source libraries for geocomputing and reproducible research
- learn new methods for analysis and visualization of geospatial data
- meet several sources for geospatial data
- have fun
